

DISCRETE MATHEMATICS

VOLUME 122, NUMBERS 1-3, 15 NOVEMBER 1993

CONTENTS

<i>K.S. Bagga, L.W. Beineke, M.J. Lipman and R.E. Pippert</i> On the honesty of graph complements	1
<i>P. Bandieri</i> Contracted k -tessellations of closed surfaces	7
<i>B. Bollobás and I. Leader</i> Maximal sets of given diameter in the grid and the torus	15
<i>H.J. Broersma, J. van den Heuvel and H.J. Veldman</i> A generalization of Ore's Theorem involving neighborhood unions	37
<i>R.A. Brualdi and J.J.Q. Massey</i> Incidence and strong edge colorings of graphs	51
<i>W.Y.C. Chen</i> The theory of compositionals	59
<i>E.J. Cockayne and C.M. Mynhardt</i> The sequence of upper and lower domination, independence and irredundance numbers of a graph	89
<i>K.L. Collins</i> Factoring distance matrix polynomials	103
<i>S. Das and M. Sen</i> An interval digraph in relation to its associated bipartite graph	113
<i>C. De Felice</i> A partial result about the factorization conjecture for finite variable-length codes	137
<i>T.C. Enns</i> Hamiltonian circuits and paths in subset graphs with circular adjacency	153
<i>H. Galeana-Sánchez</i> Normal fraternally orientable graphs satisfy the strong perfect graph conjecture	167
<i>P. Hansen and M. Zheng</i> A linear algorithm for perfect matching in hexagonal systems	179
<i>F. Harary, S. Lawrencenko and V. Korzhik</i> Realizing the chromatic numbers of triangulations of surfaces	197
<i>P. Horák and Z. Tuza</i> Large s -representable set systems with low maximum degree	205

<i>K.L. Collins</i> Factoring distance matrix polynomials	103
<i>S. Das and M. Sen</i> An interval digraph in relation to its associated bipartite graph	113
<i>C. De Felice</i> A partial result about the factorization conjecture for finite variable-length codes	137
<i>T.C. Enns</i> Hamiltonian circuits and paths in subset graphs with circular adjacency	153
<i>H. Galeana-Sánchez</i> Normal fraternally orientable graphs satisfy the strong perfect graph conjecture	167
<i>P. Hansen and M. Zheng</i> A linear algorithm for perfect matching in hexagonal systems	179
<i>F. Harary, S. Lawrencenko and V. Korzhik</i> Realizing the chromatic numbers of triangulations of surfaces	197
<i>P. Horák and Z. Tuza</i> Large s -representable set systems with low maximum degree	205

<i>A.V. Ivashchenko</i> Representation of smooth surfaces by graphs. Transformations of graphs which do not change the Euler characteristic of graphs	219
<i>K. Kołodziejczyk</i> Borsuk covering and planar sets with unique completion	235
<i>R. Laskar, S. Stueckle and B. Piazza</i> On the edge-integrity of some graphs and their complements	245
<i>C. Laywine</i> A counter-example to a conjecture relating complete sets of frequency squares and affine geometries	255
<i>G. Pirillo</i> On a combinatorial property of Fibonacci semigroup	263
<i>R.L. Roth</i> Perfect colorings of multipatterns in the plane	269
<i>E.G. Thurber</i> Addition chains — an erratic sequence	287
<i>A.T. White</i> Treble dodging minor methods: ringing the cosets, on six bells	307
<i>M. Yu</i> On path factorizations of complete multipartite graphs	325
Communications	
<i>J. Harant</i> An upper bound for the radius of a 3-connected graph	335
<i>S.M. Selkow</i> The independence number of graphs in terms of degrees	343
Notes	
<i>M. Bóna</i> A Euclidean Ramsey theorem	349
<i>D. Hanson G. MacGillivray and D. Youngs</i> The size of a minimum five-chromatic K_4 -free graph	353
<i>X.-D. Jia</i> Some remarks on minimal bases and maximal nonbases of integers	357
<i>C. Lai</i> On the size of graphs with all cycle having distinct length	363
<i>N.-Z. Li and E.G. Whitehead Jr</i> The chromaticity of certain graphs with five triangles	365
<i>M. Lovrečić Saražin</i> On the hamiltonian index of a graph	373

<i>E. Montenegro and R. Salazar</i> A result about the incident edges in the graphs M_n	377
<i>S. Rudeanu</i> Unique solutions of Boolean ring equations	381
<i>M.F.M. Stallmann</i> On counting planar embeddings	385
<i>U. Teschner</i> A counterexample to a conjecture on the bondage number of a graph	393
Research problems	397
Author index to volume 122	399
